

BOOK ANNOUNCEMENT

# THE GREEN **REAL** NEW DEAL

American Energy, National Security, and a Better Plan for Our Environment

Bill Herrington

## The Energy Wake-Up Call for Americans

The all-in stance in favor of renewables has rendered Europe vulnerable to Putin. And America is in danger of making the same catastrophic mistake. The Green Real Deal exposes the danger of plans like the Green New Deal—and reveals the truth about U.S. energy, national security, and our environment:

- Why Russia is spreading propaganda to destroy hydraulic fracturing and divide democracy
- Three faulty accusations behind protests against pipelines
- The inconvenient truths of “green” energy

Release Date: July 2023 • Politics & Government  
300 pages • \$18.95 • Available in paperback, hardcover, e-book & audiobook

“A welcome antidote to the glib statements being made by math-challenged politicians and academics about the ease with which we should forsake hydrocarbons and turn our economy over to weather-dependent renewables. Bill Herrington is right that ‘renewables cannot — will not — meet soaring global energy demand’ and that we must ‘recommit ourselves to nuclear in a smarter way.’ Amen to that. Herrington has written a personal and sober assessment of the energy situation in America. Recommended.”

— Robert Bryce, writer, film producer, and host of the *Power Hungry* podcast

**Bill Herrington** worked as a laborer on pipeline construction crews during the summers of 1979 and 1980. His first pipeline job was in Harrisburg, Pennsylvania, three months after the nuclear accident at Three Mile Island, just south of Harrisburg.

After graduating from Louisiana State University, Herrington began a 35-year career in corporate banking, which included a focus on the energy service industry in south Louisiana and Texas. He has completed the Harvard Business School general manager program and is now a private equity and private credit investor based in Houston, Texas.

Herrington’s first book, *Contraflow*, won the 2017 Independent Publisher Bronze Medal for Best Regional Nonfiction (South U.S.) and was endorsed by eight prominent state and national leaders.
