

Medicine at the Crossroads

Michael Attas, MDiv, MD

Foreword by Ken Starr

Stories and Conversations to Forge a Vision for Health Care

In his collection of essays, Dr. Michael Attas addresses the most pressing questions in medicine today through the lens of the medical humanities. Individually, each story of illness, medicine, and healing provides a tiny, fragmented glimpse into the heart of a problem. Collectively, the stories forge together to help physicians, patients, and other healthcare participants find their way to compassionate, humane health care—and, ultimately, healing for all.

Release: November 2018 ♦ 200 pages ♦ Available in paperback and e-book

Read the author interview

“In a time of radical change in health care, when the very practice of medicine is in question, Dr. Attas shows us that the essential relationship is between the patient and the physician.”

— UNITED STATES AMBASSADOR LYNDON L. OLSON, JR.

“Candid, transparent, and provocative, helping us understand how the science and art of medicine intersect. A must-read for anyone entering or serving in health care.”

— JOEL T. ALLISON, FACHE, RETIRED CEO,
BAYLOR SCOTT AND WHITE HEALTH
Senior Advisor, Robbins Institute for Health Policy and Leadership

“Reclaims ancient wisdom and offers a new vision. I hope every clinician reads it.”

— KERRY EGAN, MDIV, AUTHOR OF *ON LIVING*

“An important conversation about the future of health care, reminding future healthcare professionals of their sacred duty to care for patients and urging us all to build a healthcare system based on compassion, wisdom, and justice.”

— LAUREN BARRON, MD
Director, Medical Humanities Program, Baylor University
